

Frequency Table

A **frequency table** is a way of organising collected data. To do this we draw a table with **three columns**:

- The first column is for the different items in the data set.
- The second column is for the tally marks.
- The last column is the frequency column where we can add up the tally marks and write in the corresponding frequencies.

We can add up all of the frequencies to find the total frequency of the set of data.

E.g. Colours of 12 shirts in a wardrobe,

blue	pink	blue	white	white	blue
black	white	blue	pink	blue	white

Colour	Tally marks	Frequency
Black		1
Blue		5
Pink		2
White		4
		Total = 12

Open-ended & Closed ended Questions Definition

Open-ended Questions

Open-ended questions are the ones that cannot be answered with just "Yes" or "No." They need a longer and more detailed answer in your own words.

Examples:

What do you like most about your school? 📚

How can we protect the environment? 🌳♻️

Why is reading important for students? 📖

Close-ended Questions

Close-ended questions can be answered with a single word or short phrase, such as "Yes," "No," or a specific fact.

Examples :

Do you like ice cream? 😊

Is the sun a star? ☀️

Have you finished your homework? ✍️

Survey Design Task (Home Task)

Choose any topic of your interest and design a short survey.

- Create **3 open-ended questions** related to your chosen topic.
- Create **3 closed-ended questions** related to the same topic.
- For each closed-ended question, provide suitable **answer choices**.

Example Topics:

Sports • Reading • Technology • School Lunch • Homework • Hobbies •
Music • Travel

Challenge: Make your questions clear, simple, and unbiased.
