

Criteria A: Knowledge and Understanding

- i. use a wide range of terminology in context
- ii. demonstrate knowledge and understanding of subject-specific content and concepts through developed descriptions, explanations, and examples.

Achievement level	Task-specific clarification
0	The student does not reach a standard described by any of the descriptors below.
1-2	The student: Uses limited settlement vocabulary (e.g., <i>city, building</i>). Demonstrates basic knowledge of the chosen settlement with brief descriptions of its physical features or timeline, but lacks detailed examples or explanations.
3-4	The student: Uses some subject-specific terminology correctly (e.g., <i>urbanization, migration, infrastructure, site/situation</i>). Demonstrates satisfactory understanding by describing the settlement's natural features, evolution timeline, strengths, and limitations with basic examples.
5-6	The student: Uses a range of subject-specific terminology accurately in context (e.g., <i>settlement functions, informal housing, resource allocation, sustainable development</i>). Demonstrates good understanding through clear descriptions and detailed explanations of how the settlement evolved and changed over time.
7-8	The student: Consistently uses a wide range of complex terminology in context (e.g., <i>spatial distribution, urban density, sponge city, ecological balance</i>). Demonstrates thorough knowledge and deep understanding through fully developed explanations, well-supported historical details, and specific local examples.

Criterion B: Investigating

- i. explain the choice of a research question
- iii. collect and record relevant information consistent with the research question
- iv. reflect on the process and results of the investigation.

IB MYP
Summative Assessment - 2 (July 2026)

Achievement level	Task-specific clarification
0	The student does not reach a standard described by any of the descriptors below
1-2	The student: Outlines or states a research question with minimal or no explanation . Collects limited or irrelevant notes regarding the settlement's features, evolution, or limitations. Provides a brief or incomplete reflection on the research process
3-4	The student: States and partially explains the choice of the research question . Collects and records mostly relevant information on the settlement's origin, strengths, and challenges across the Part 1 research journal. Offers a basic reflection on what worked or what was challenging during research.
5-6	The student: Explains the choice of the research question clearly , showing why it is relevant to settlement change. Collects and records relevant, structured information (natural features, timeline, strengths, and limitations) directly addressing the research focus. Reflects in detail on the research process and results.
7-8	The student: Fully and effectively explains the choice and relevance of the research question . Collects and organizes comprehensive, highly relevant, and detailed data covering the origin, evolution, strengths, and resource challenges of the settlement. Provides a thoughtful, critical evaluation of the research process , detailing successes, challenges, and source reliability.
