

GRASPS Task – MYP 1 Integrated Science

Unit: What Do Scientists Do?

Investigating a Famous Scientist

G – Goal

Learn about a famous scientist and explain how their work helped people understand the world better.

R – Role

You are a young science reporter writing for the school science magazine.

A – Audience

Middle school students who want to learn about scientists and their discoveries.

S – Situation

The school science magazine is creating a special section called "**Science Legends.**" You have been asked to create a scientist profile that shows who the scientist was, what they discovered, and why their work is still important today.

P – Product

Create an **A3 Poster** about one famous scientist.

Choose a scientist such as:

- Marie Curie
- Albert Einstein
- Isaac Newton
- Galileo Galilei
- Charles Darwin
- Jane Goodall
- Stephen Hawking
- Rosalind Franklin

Your A3 Poster Must Include:

1. Scientist Information

- Name of the scientist
- Picture of the scientist
- When and where they lived

2. What Are They Famous For?

- What discovery, invention, or idea made them famous?

3. What Inspired Them?

- How did they become interested in science?

4. A Challenge They Faced

- What difficulty did they face?
- How did they overcome it?

5. Why Was Their Work Important?

- How did their discovery help people?
- What did it change or improve?

6. Why Is It Important Today?

- Give 1–2 examples of how we still use their ideas or discoveries today.

7. Fun Fact

- Include one interesting fact or quote about the scientist.

8. Sources

- Write the names of at least **2 sources** you used.

Poster Requirements

Use an A3 sheet

Include pictures and headings

Write in your own words

Keep information clear and organized

Make your poster neat, colourful, and creative

Success Criteria

I can:

- Research information about a scientist.
- Explain their discoveries in simple words.
- Describe how their work helped society.
- Connect their work to life today.
- Present information clearly and creatively.
