

Question	Independent Variable	What Do You Change?	Dependent Variable	How Do You Measure It?	Control Variables
1. How does the type of exercise affect heart rate?	Type of exercise	Walking, jogging, cycling, etc.	Heart rate	Beats per minute (BPM) using a stopwatch or heart-rate monitor	Same person, same duration of exercise, same environment
2. How does the amount of time spent studying affect test scores?	Time spent studying	Number of hours/minutes studied-1 hr, 2hrs, 4hrs	Test score	Marks or percentage obtained in the test	Same test, same study material, same student conditions
3. How does temperature affect the solubility of salt in water?	Temperature of water	Water temperature Normal, hot, cold	Solubility of salt	Amount of salt dissolved (g)	Same type of salt, same amount of water, same container
4. How does the design of a paper airplane affect the distance it flies?	Design of paper airplane	Airplane shape/design Small, medium, large	Distance travelled	Measure distance in metres/cm	Same paper, same thrower, same throwing force, same location
5. How does the type of breakfast affect students' energy levels throughout the morning?	Type of breakfast	Different breakfast foods Banana, pizza, milk	Energy level	Energy survey/rating scale or activity performance	Same student age group, same school day, same time of measurement
6. How does the amount of sunlight affect plant growth?	Amount of sunlight	Hours/intensity of sunlight Shade, room	Plant growth	Plant height (cm)	Same plant type, same water, same soil, same pot size
