

PIE CHARTS on Google sheets:

Step 1: Organize Your Data

Before you make the chart, you need to type your data into a table.

1. Open a new Google Sheet.
2. In Cell A1, type a heading like "Activity".
3. In Cell B1, type a heading like "Number of Students" or "Hours".
4. List your categories (Shopping, Reading, etc.) in Column A and your numbers in Column B.

Activity (Column A)	Number of Students (Column B)
With family and friends	8
Watching movies/TV	5
Eating out	4
...and so on	...

Step 2: Highlight the Data

Click and drag your mouse to select all the cells that contain your data, including the headings at the top.

Step 3: Insert the Chart

1. Go to the top menu and click Insert.
2. Select Chart from the dropdown menu.
3. A chart will appear automatically! If it isn't a pie chart, look at the Chart Editor panel that opened on the right side of your screen.
4. Under the Setup tab, click the Chart type dropdown and select Pie chart.

Step 4: Customize Your Chart

To make your chart look like the ones in the textbook, use the Customize tab in the Chart Editor:

- Chart & axis titles: Change the "Chart title" to something like "How Year 5 Students Spend Weekends".
- Pie chart: Click "Slice label" and select Percentage. This will put the % numbers right on the slices.

- Pie slice: You can change the colors of individual slices to match the 2005 or 2010 graphs in your book.
- Legend: You can move the labels (like "Reading") to the top, bottom, or sides of the circle.

Step 5: Save and Share

- To move it: Click and drag the chart anywhere on your sheet.
- To download: Click the three dots (:) in the top right corner of the chart, select Download, and choose PNG image. This allows you to paste it into a Word document or a presentation.
