

Students Name:		Grade: MYP 1	Date:
Subject: Individuals and Societies	Unit Title: Where do we Live?		Task Duration: 60 Minutes
SOI: As settlements change and grow, they affect the places we live, the way people interact, and how communities live, shaping our identity, relationships, and well-being over time.			
ATL Category, Cluster & Strand: Thinking Skills: Critical thinking skills: Analysing and evaluating issues and ideas: - Practise observing carefully in order to recognise problems Research skills: Information Literacy Skills: Finding, interpreting, judging, and creating information: - Collect and analyse data to identify solutions and make informed decisions - Make connections between various sources of information			
Criteria Assessed: Criterion A: Knowing and understanding i. use vocabulary in context ii. demonstrate knowledge and understanding of subject-specific content and concepts, using descriptions, explanations and examples Criterion B: Investigating i. formulate/choose a clear and focused research question, explaining its relevance ii. formulate and follow an action plan to investigate a research question iii. use methods to collect and record relevant information iv. evaluate the research process and results, with guidance Criterion D: Thinking Critically i. identify the main points of ideas, events, visual representation or arguments ii. use information to justify an opinion iii. identify and analyse a range of sources/data in terms of origin and purpose iv. identify different views and their implications.		Levels Scored (Out of 8): A - B - D -	

My strengths in this task	
---------------------------	--

My weak areas in this task	
Skills that I have developed through this task	
My strategies for further improvement	
Students Name and signature	

Task Overview

You are a City Planner hired by a local government. Your mission is to investigate how a settlement changes over time and present a realistic redesign proposal that meets community needs sustainably.

(Example: You can choose a certain city such as Hyderabad, Chennai or Bangalore and propose redesigning ideas to deal with monsoon flooding etc.)

Role & Scenario

You are a **City Planner**. A local government wants to redesign a fast-growing settlement (*you can choose a real city/town like Hyderabad, Tokyo or your hometown or any city, town or village that you are particularly curious about*).

The settlement is growing because **more people are moving there and the population is increasing**. As the settlement grows, it may face problems such as:

- Traffic and transportation
- Lack of housing
- Less green space
- Pressure on resources
- Loss of historical places and culture
- Social inequality
- Growth of informal settlements
- and many more....

Your role is to create a **Settlement Research & Redesign Blueprint**. Your blueprint will have **two parts**:

- **Part 1: The Investigation Journal** (Criteria B)
- **Part 2: The Critical Urban Proposal** (Criteria D)

Part 1: The Investigation Journal (Criteria B)

Students will **create** a **booklet** and include the following information:

- **Identify a city/area** of your choice of a fast growing settlement
- **Identify the research question**
- **List** the climate, natural features, population size
- Describe a brief **historical development of the chosen location/area** (include a timeline to record key events related to the place from the beginning till now)
- **Outline** important events in detailed examples such as; *Why did it occur? Who was responsible for it and how did it change the place?*
- **Identify** two strengths (What makes it a good settlement? Refer to settlement functions).
- **Identify** two limitations (What are the problems regularly occurring in this settlement? What is the cause)

Part 2: The Critical Urban Proposal (Criteria D)

1.1 **Identify** 3 main visual features and **describe** what they reveal about community access to resources.

Attach or refer to a map, photograph, or diagram of your settlement (e.g., Old vs. New Delhi, an informal settlement, or a satellite city). Identify 3 main visual features

1.2 **Describe** what they (visual features) reveal about community access to resources.

1.1 Visual features	1.2 What does it reveal about community life and access to resources?
Feature 1: (e.g., Narrow winding streets / High-rise blocks)	
Feature 2: (e.g., Green parks / Lack of open space)	
Feature 3: (e.g., Highway access / Railway line)	

1.3 **State** your opinion, is your chosen settlement currently growing in a sustainable way? Support your view with concrete evidence from your Part 1 research (e.g., housing quality, waste

State your position clearly (e.g., 'In my opinion, [Settlement Name] is currently unsustainable because...')

Source	Origin (e.g., Source A = City Planning Website; Source B = Resident Interview or News Article) Mention the name of the website, title of the article or video and the year it was published if available)
Source A	
Source B	

Describe how it balances community identity AND resource conservation.

[illegible]

Criteria A: Knowledge and Understanding

- i. use a wide range of terminology in context
- ii. demonstrate knowledge and understanding of subject-specific content and concepts through developed descriptions, explanations, and examples.

Achievement level	Task-specific clarification
0	The student does not reach a standard described by any of the descriptors below.
1-2	The student: Uses limited settlement vocabulary (e.g., <i>city, building</i>). Demonstrates basic knowledge of the chosen settlement with brief descriptions of its physical features or timeline, but lacks detailed examples or explanations.
3-4	The student: Uses some subject-specific terminology correctly (e.g., <i>urbanization, migration, infrastructure, site/situation</i>). Demonstrates satisfactory understanding by describing the settlement's natural features, evolution timeline, strengths, and limitations with basic examples.
5-6	The student: Uses a range of subject-specific terminology accurately in context (e.g., <i>settlement functions, informal housing, resource allocation, sustainable development</i>). Demonstrates good understanding through clear descriptions and detailed explanations of how the settlement evolved and changed over time.
7-8	The student: Consistently uses a wide range of complex terminology in context (e.g., <i>spatial distribution, urban density, sponge city, ecological balance</i>). Demonstrates thorough knowledge and deep understanding through fully developed explanations, well-supported historical details, and specific local examples.

Criterion B: Investigating

- i. explain the choice of a research question
- iii. collect and record relevant information consistent with the research question
- iv. reflect on the process and results of the investigation.

Achievement level	Task-specific clarification
0	The student does not reach a standard described by any of the descriptors below
1-2	The student: Outlines or states a research question with minimal or no explanation . Collects limited or irrelevant notes regarding the settlement's features, evolution, or limitations. Provides a brief or incomplete reflection on the research process
3-4	The student: States and partially explains the choice of the research question . Collects and records mostly relevant information on the settlement's origin, strengths, and challenges across the Part 1 research journal. Offers a basic reflection on what worked or what was challenging during research.

5-6	The student: Explains the choice of the research question clearly , showing why it is relevant to settlement change. Collects and records relevant, structured information (natural features, timeline, strengths, and limitations) directly addressing the research focus. Reflects in detail on the research process and results.
7-8	The student: Fully and effectively explains the choice and relevance of the research question . Collects and organizes comprehensive, highly relevant, and detailed data covering the origin, evolution, strengths, and resource challenges of the settlement. Provides a thoughtful, critical evaluation of the research process , detailing successes, challenges, and source reliability.

Criterion D: Thinking critically

- i. identify the main points of ideas, events, visual representation or arguments
- ii. use information to justify an opinion
- iii. identify and analyse a range of sources/data in terms of origin and purpose
- iv. identify different views and their implications.

Achievement level	Task-specific clarification
0	The student does not reach a standard described by any of the descriptors below
1-2	The student: Identifies 1-2 basic visual features from a map/photo with limited connection to community resources. States a simple opinion on sustainability without clear evidence. Mentions 1 source with incomplete origin/purpose details. Identifies one viewpoint with limited depth.
3-4	The student: Identifies 3 visual features from a map/photo and partially explains what they reveal about resource access. Expresses an opinion on whether the settlement is growing sustainably, backed by basic evidence (e.g., housing, transport). Identifies the origin and purpose of 2 sources . Outlines contrasting viewpoints or a simple redesign proposal.
5-6	The student: Clearly identifies 3 visual features and explains in detail what they reveal about community life and resource distribution. Justifies a well-developed opinion on sustainability using concrete research evidence . Accurately identifies and analyzes 2 sources in terms of origin and purpose . Explains different stakeholder views and proposes a clear, eco-friendly redesign solution.
7-8	The student: Insightfully analyzes 3 key visual features , providing deep analysis of community resource equity. Convincingly justifies a comprehensive opinion on sustainability using robust, specific research evidence . Thoroughly analyzes 2 diverse sources by origin and purpose . Synthesizes competing viewpoints and their implications , presenting a realistic, highly justified urban redesign proposal that effectively balances community identity and resource

	conservation.
